Testimonial

To: Shri Babanrao Patil

I, Founder-CEO of PRASANNA HRD, am in Corporate Training and Business Coaching since 15 years offering my services to hundreds of esteemed companies and thousands of individuals. Let me express a deep sense of gratitude to you for your visit at my residence.

First of all, I am more spiritual and less religious. Due to request of my wife, I decided to invite a Vastu Consultant at residence. Since Shri Babanrao Patil is a good friend of mine and I have known him for over 8 months now, I invited him at my residence.

Though I am not in full agreement that Vastu as a Science, the discussions on Vastu with Shri Babanrao Patil at BNL are always captivating as he shows living places or legendary monuments as examples that stuns anybody. I like the way you being straight forward and not subscribing to shortcuts in balancing the vastu by any other means. Your advice on Vastu in a construction/ architecture, place and positions of the living places is very clear and just does not give any half hearted solution.

Shri Babanrao Patil has clear do's and don'ts in the play with Vastu. My family has found it enriching and his inputs towards vastu for my home has made many good.

Thanks for your valuable time at my residence. I know there is a thin line between Science and Belief. If any thing is supported with fact and proof, it becomes Science, if not then it becomes Belief. If there is any thing which cannot be proved, it does not mean that it is a fiction, but, it means that at present our knowledge is limited and we need time to prove it. You are doing a great work to turn belief into science about Vastu with your sincere efforts. God bless.

Regards,

Bipin Mayekar
